

# HYDROGEL RIBBON DRESSING

**A chitosan-based hydrogel ribbon dressing designed to support an optimal moist healing environment.**

✓ **THE IDEAL HEALING ENVIRONMENT**

Promote a moist wound environment for optimal healing; hydrated dressing forms a soft gel for optimal interaction

✓ **HIGHLY ABSORBENT AND HAEMOSTATIC**

Effectively manage moderate to heavy exudate and control minor bleeding in superficial wounds

✓ **PAIN-FREE, GENTLE REMOVAL**

Easily remove the dressing in one piece without damaging new tissue or causing pain to the patient

✓ **PATHOGEN LOCK**

Bind and lock away bacteria to reduce infection risk thanks to chitosan's natural antimicrobial properties

## Indication

The Recibio, Inc. CeaLogic Hydrogel Ribbon Dressing is indicated for the management of moderate to heavily exuding chronic and acute wounds.

The CeaLogic Hydrogel Ribbon Dressing is easily applicable to the cesarean wound to support healing following delivery.

## PRODUCT HIGHLIGHTS

### CHITOSAN-BASED

Derived from crustacean shells, chitosan is natural, biodegradable, and has antimicrobial properties.

### IDEAL SIZE

Large width and extended ribbon length when folded accommodates a full range of cesarean incision sizes.

### ADVANCED ABSORPTION

Proprietary design allows for folding over to double fluid absorption and capacity.

Qty.	Component
1	Hydrogel Ribbon Dressing
